

ADVANTAGES

- High filtration efficiency
- Extended filter life
- Low pressure drop

Application	The Quantum Series filter cartridges can be used for applications like laser cutting, laser welding and plasma cutting as well as manual welding and grinding processes.
Media	Synthetic
Max Temperature (°C)	100°C
Comment	The Quantum Series filter cartridges are manufactured with our durable polyester filter media, using a laminated PTFE membrane providing high filtration efficiencies on fine particulate and superior dust cake release. Camfil's dust collection filter medias are all tested to meet with European dust filter standard EN 60335-2-69 dust Class M.
